

# 1025 BT-101 Battery Load Tester

- 6V & 12V battery tester is designed for fast and accurate monitoring of battery condition.
- It is equipped with multiple test function such as battery load test, motor cranking test and charging system test.
- Robust design, light weight and large display are some of the special features that provide user the flexibility of movement and fast judgement when carrying out tests.

- Heavy duty insulated battery clamps are selected to ensure safe and proper application.
- Battery Rating : 6V and 12V batteries
- Checking Parameters : Battery load test
- Motor cranking test : Charging system test
- Safety Features – Reverse polarity protection – Automatic overload cut-off – Overload alarm (optional)
- Battery Load Test Duration : 10 seconds (maximum)
- Terminal Clips : 200 Amps high quality clips
- Dimension : (W)180mm x (D)85mm x (H)300mm • Weight (KG) : 1.85
