

3346 Multi Purpose Cooling System Test Kit (21pcs)

- Set for testing leaks in automotive cooling system and major cooling system components such as thermostat, water pump, water temperature sensor and cooling fan.
- Help mechanics test thermostat, water pump, water temperature sensor and cooling fan without removing any single parts on engine.
- Includes a displaying device (DIGITAL LCD) that provides an effective communication between mechanics and car owners.
- Includes step adaptors fitting most vehicles after market.
- Made In Taiwan
