

# 7103 Brake Fluid Exchange Machine with Pulsating Effect

- Pulsating effect to clean debris in brake system effectively
- Automatic shut-off when brake fluid level runs low
- Forced drain function to allow the machine to work with different brake fluid specs
- Self purge function is included to prevent air bubble from being introduced into the brake system
- Unique 100% transparent and brake fluid resistant 2 liter tank allows users to see the remaining brake fluid volume
- Uses car battery as the power source, increasing working flexibility

- Made In Taiwan

Note: Battery not included
