

# EQ-TWK202 TightWire Startup Kit (USA)

- The TightWire included in this kit is designed to cut out windshields and resists breaking in the process.
- It is made of 3 extremely strong stainless steel wires that are braided to form one wire.
- Then the wire is anodized to a smooth, gold finish.
- Braided wire allows for a sawing action to cut urethane when pulled in a straight line.
- With the WireStarter tool it allows you to push wire through urethane with ease.
- It is constructed of stainless steel. Simply lay flat side of aluminum handle on glass and then push tube through urethane.
- GripTite handles keeps the wire away from your fingers at any angle.
- Contoured handles for non-slip grip.

**Kit includes:**

- (1) TightWire™ 72-ft. Roll (TW72)
- (1) WireStarter™ 4-inch tube (WS782)
- (1) pair of GripTite™ wire-gripping handles (LWH200)

TightWire and WireStarter are Made in USA!
