

# M0035 Harley Davidson Rear Axle Nut Wrench

- 36mm Bi-Hex (1-13/32") with 1/2"Dr driver receiver hole for inserting your torque wrench thus letting you torque the axle nut an offset position.
- This will make adjusting the drive belt tension or rear wheel alignment a bit easier
- Save your time by eliminating the need to remove the mufflers to perform this service.
- Applicable : 2006 present FL Touring model 2008 and later, V-Rod 2005 ~ present
