- Fit : M16 x P1.5 : Honda, Kawasaki, Suzuki, Yamaha
- Fit : M14 x P1.5 : Honda, Suzuki
- This six size are always cover 50% motorcycle magneto used.

- Since the flywheel products are the taper lock types, they can only be disengaged using the designed tool.
- Use with a soft face hammer for quick removal from tapered shafts.
- T-Bar structure designed to avoid grip in the thread on the move, will not be injured at work sometimes.
- S type welding structure can effectively increase the tool torque value.
